

ANXA11 antibody

Cat # NB-19-0041

Immunogen Data

Description: Annexin A11 belongs to a family of Ca (2+) -dependent phospholipid binding proteins and is found throughout the nucleoplasm. At interphase and at the mitotic phase Annexin A11 is concentrated at the loop-like structure around the mitotic apparatus, playing an important role in cytokinetic process. Annexin A11 has a molecular mass of 56 kDa. It has been described that Annexin A11 could be a biomarker for Dry Eye Syndrome (Patent num. EP10382229.2)

Immunogen: Protein corresponding to full-length Human ANXA11 (aa 1-505; NP_001148).

Synonyms: Annexin XI; Annexin-11; ANX11; anxa 11; ANXA11; autoantigen 56-kD; Calcyclin-associated annexin 50; CAP-50; CAP50

Antibody Data

Host: Mouse

Clonality: Monoclonal **Clone:** P3F9 **Isotype:** IgG1 k

Species Reactivity: Annexin A11 protein

Volume: bulk quantity

Concentration: lot dependent

Purity: Protein G affinity purified

Storage Buffer: Phosphate-buffered Saline pH 7,4

Storage Instruction: Aliquots should be stored at -20°C or -80°C. Avoid freeze-thaw cycles.

Applications

Tested Applications: ELISA. The usefulness of this product in other applications has not been determined.

For Research Use Only. Not for Diagnostic or Therapeutic Use.
