

Normal Mouse serum blocking buffer

Normal Mouse Serum

NB-23-00187-1 (100 ml)

NB-23-00187-2 (18 ml)

Normal Mouse serum blocking buffer

NB-23-00187-1; NB-23-00187-2

Storage: 2-8°C

INTENDED USE:

Normal Mouse serum blocking buffer is used in immunohistochemical staining procedures to block non-specific staining when the host species of the secondary antibody is Mouse.

KIT COMPONENTS:

Catalog No.	Size
NB-23-00187-2	18 mL (Ready to use)
NB-23-00187-1	100 mL (Ready to use)

RECOMMENDED PROTOCOL:

1. Apply 100uL or enough volume of **Normal Mouse Serum Blocking Buffer** on tissue before adding primary antibody and incubate for 10 minutes at room temperature.
2. Blot off Normal Mouse Serum Blocking Buffer Solution (**Do not rinse**) and add primary antibody.

PRECAUTION:

Please wear gloves and take other necessary precautions.
