

Monoclonal anti-AID (Activation-induced cytidine deaminase)

NB-01-0004

Volume: 100 µl

Clones: 1AID-2E11

Immunogen: Synthetic peptide coupled to Ovalbumin: (C)-EVDDLRLDAFRMLGF corresponding to aa 185 to 198 of mouse AID.

Murine Isotype: IgG1, k

Specificity: mouse and human AID

Applications:

- ELISA
- Western Blot
- Immunofluorescence
- Immunoprecipitation

Recommended dilutions: 1/500 – 1/5000

Storage:

- Store at -20°C (up to 3 years)
- Avoid repeat freezing and thawing cycles. Does not contain any preservative
