

Silica Spin Column

Feature

- Mini Spin Columns for DNA extraction
- Silica membrane based spin column.
- Compatible with Qiagen's and Invitrogen's buffer.
- High quality for DNA purification and has been used extensively in house application and by many academic labs.
- Economical for large sample process.

Mini Spin Column III # NB-03-0040 (1000 units)

Features

- High binding capacity

Applications

- Extraction Plasmid DNA

Technology	Silica-membrane technology
Format	Mini spin columns
DNA size	Plasmid DNA < 10kbp
$A_{260/280}$	1.85-1.95
Binding capacity	55 μ g
