

## Monoclonal anti-FXR1P (encoded by FXR1 gene, FMRP homologue)

**NB-01-0039**

**Volume:** 100 µl

**Clones:** 3FX 2B12

**Immunogen:** LKDPDSNPYSLLDNTESDQT-(C) a synthetic peptide corresponding to residues 469 to 488 of FXR1 coupled to ovalbumin. (numbering depends on isoform). This peptide sequence is totally conserved (100% identity) in mouse, dog, rat, bovine, chicken, frog (*Xenopus laevis* and *tropicalis*), and 90% identical in zebra fish (*Danio rerio*)

**Murine Isotype:** IgG1, k

**Specificity:** FXR1 (Fragile X related 1) protein from human, mouse, *Xenopus laevis* (expected also in chicken). Detects all 7 isoforms (from 70 to 84 kDa, including muscle specific isoforms of 82 and 84 kDa). Slightly cross react to FXR2P (at 94 kDa in WB, Khandjian et al 1998), but this appears undetectable by immunohistochemistry in FXR1 KO mouse (Mientjes et al. 2004)

### Applications:

- ELISA
- Western Blot
- Immunocytochemistry
- Immunohistochemistry
- immunoprecipitation

**Recommended dilutions:** 1/500-1/5000

### Storage:

Store at -20°C (up to 3 years)

Avoid repeat freezing and thawing cycles. Does not contain any preservative
